

What are cookies?

Cookies are small, simple text files that are placed on your computer, tablet or mobile phone via our website when you visit our website. The cookies we use on our website do not retain any personal information, such as your password, name, address or age. The cookies only remember your preferences and interests.

We use cookies for various reasons. Below you can read more about the 3 different categories of cookies that LTO Network B.V., incorporated in Amsterdam, the Netherlands, under the laws of the Netherlands, hereafter "LTO Network", uses on the website <https://lto.network/>.

1. Necessary cookies

Some cookies are necessary for the functioning of our website. These cookies contribute to safe browsing. If your browser does not accept <https://lto.network/> cookies, you can not use our website and your personal environment. This means that you can not or only to a very limited extent make use of our portal and the services provided therein.

2. Statistics cookies

We strive for the highest possible user experience. To achieve this, we use cookies that collect information about the use of our website.

3. External cookies

We find it important to only share information with you that is relevant. We therefore use cookies that tell us something about your user profile. We do this on our own website as well as on external websites. We show information that connects to a previous visit to our website. Did you, for example, view the page about process management on our website? Then you may see an advertisement about this service on an external website.

Overview of cookies

- [Medium.com](#)
- [Cloudflare.com](#)

- **Intercom.com**

We strive to keep this overview as up-to-date as possible. The overview was last updated on 13-02-2019

How can you block or delete cookies?

Do you prefer that LTO Network not place any cookies at all on your device? You can block or delete these cookies yourself via the privacy settings of your browser. The website may as a consequence function less optimal, or even not function at all. See the explanation above for "necessary cookies".

Block cookies

Do you want to prevent new cookies from being placed? You can turn off the possibility that cookies are stored on your computer, tablet or mobile. There are various ways to block cookies. You can block all cookies, block a specific type of cookie or block cookies from certain websites. You can do this yourself through the privacy settings of your browser. When cookies are blocked, all cookies remain that were already present on your computer, tablet or mobile. It's best therefore to remove all your already placed cookies in addition to blocking.

Delete cookies

Do you want to delete all cookies on your computer? No problem. But keep in mind that by removing cookies you will experience less user convenience when you visit websites. Certain settings will no longer be saved and you may miss out on relevant offers. Incidentally, cookies will be stored on your computer, tablet or mobile after every internet visit, unless you have blocked the placement of new cookies.

The settings for removing cookies can be found in the toolbar of your browser. You can read more about this on the websites of the browsers [Internet Explorer](#), [Mozilla Firefox](#) or [Google Chrome](#). Do you use Safari? Safari blocks advertiser cookies by default. You can change this setting by clicking on the symbol for settings at the top right. Then go to 'Preferences', tab 'Privacy'. You can then choose from 3 settings.
